HEARING ASSISTANCE EQUIPMENT INSTRUCTIONS

Some of our larger auditorium spaces have sound reinforcement equipment for hearing assistance. To locate a classroom with hearing assistance equipment, click here: http://z.umn.edu/hearingassist

How to Use

1. Remove a headset from the charging cradle located at or near the instructor station.

2. Put on the headset. For best reception, put the headset in front of face with the earphones on top and the company logo on the bottom, facing outward. Adjust the volume to desired level using the volume knob.

3. Return the headset to the charging cradle when finished.

Tips for Use

**DO NOT** place or store any liquid or metal objects near the hearing assist charging cradle. This will cause possible interference, electrical shorting, or shock.

Any sound that is coming through the classroom system (such as audio from the DVD/VHS player, laptop, and instructor microphone) should be audible on the headsets.

If you experience interference or static, try moving to a different location. Be sure to face the front of the auditorium.

Notes on Locating Equipment: Hearing assist headsets are located in the instructor station drawer, with the following exceptions: Rapson Hall 100 headsets are located in the projection booth at the rear of the classroom. The Bell Museum Auditorium headsets are located behind the stage. These locations are typically locked. For more information on accessing the booths or headsets, please contact John Knowles at 612-626-8650.
